CAD/CAM Block Locker

Control block chaos while providing a platform to present and discuss same-day restorations

According to speaker and author Dr. Gary Kadi, less than 5% of dental practitioners feel that they use organizational systems efficiently. So, when they invest in new products and techniques in hopes of bettering their dentistry, they also seek greater efficiency and improvements to the overall patient experience.

Zirc now offers sleek, modern, organization, and inventory management for all CAD/CAM milling blocks and accessories. The CAD/CAM Block Locker fits all CAD/CAM milling blocks, including from PrograMill, CEREC, and PlanMill, and provides dental practices with a convenient method to store and manage blocks and accessories.

"Not only does the CAD/CAM Block Locker create a professional space to store and showcase milling blocks for patients, it also provides a platform to present and discuss same-day restorations with patients," said Holly Winn, Marketing Manager for Zirc.

Manage Inventory with Ease

The CAD/CAM Block Locker is available in 2 sizes—small and large. The small cabinet holds up to 288 individual blocks, while the large cabinet holds up to 48 packages of blocks and maximum of 312 individual blocks. Both formats allow clinicians to sort individual blocks using block dividers and use online customization tags to create organization by color and shade. A 3-inch-deep drawer also can accommodate accessories, such as burs and lubricants.

"The CAD/CAM Block Locker allows you to store individual blocks as well as packages, which allows for proper organization to help keep clinicians working in a timely fashion," said Winn.

The wall-mounted unit features a dark gray

powder-coated finish for a sleek, modern look. Internal resin block organizers are available in 7 color choices.

"The CAD/CAM Block Locker allows for easy inventory management at a glance, so there is no guessing about quantities of shades you already have or, may be missing," Winn added.
