

PROTECTION PACK

Dental Aerosols & Spatter... What precautions are you taking?

Dental aerosols are some of the most dangerous contamination carriers in the dental practice. Our innovative isolation and evacuation devices including Mr. Thirsty® One-Step, Insti-Dam® & Pink Petal® are leading products that help reduce spatter and aerosols during procedures. Reducing these aerosols will make a safer environment for both the clinical team and patients!

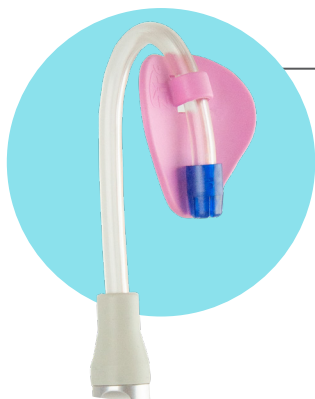

Mr. Thirsty® One-Step

Includes 1 of each size: Pado/Small & Medium/Large

- Designed with wide suction chambers for superior suction
- Connects directly to high-volume suction to reduce aerosols
- Frees up the dental assistants to complete other tasks by providing hands-free, continuous, high-volume suction

Pro Tip: An absolute must for dental hygienists to use with an ultrasonic scaler

Pink Petal®

Includes 3 samples

- Helps eliminate pooling water and saliva that could contribute to aerosols with hands-free, continuous, low-volume suction
- Utilize during an entire hand scaling procedure & coronal polish for added protection for patients and clinical team
- Slides on to any saliva ejector — no additional attachments required

Insti-Dam®

Includes 1 of each style: Original & Relaxed Fit

- Pre-assembled with built-in flexible frame for easy placement
- Isolates treatment area while controlling aerosols & aspiration hazards
- Allows for radiographs to be taken without removal of the frame
- Adjustable material on frame, making it ideal for posterior (Relaxed Fit Only)

All devices are disposable! No risk of cross contamination & no maintenance
